PROJECTS

[FaceMash ↗](#)
Aug 2024 - Present

My project is on the FaceMash using the HTML 5, CSS, javascript, React js and Tailwind CSS. Creating a new innovative projects to get the hands on experience on my web development carrier. In this project user can compare two persons with theirs like and disliking the person's. Also I included the comments section so can user leave the comment on my project. User can like or dislike the other user comments also. This project is not now ended this is the only first increment in my project and I'm trying to adding the new amazing features to my project.

SKILLS

- HTML
- Bootstrap
- ReactJS
- C Programming
- CSS
- Python
- Tailwind CSS
- PHP
- JavaScript
- MongoDB
- Computer Networks

Additional Details

I am maroti puskar , a final year B.Tech student in computer science and engineering at Shri shivaji institute of engineering & management studies parbhani with an overall cgpa of 8.00. I achieved 1st rank in my first year and am known for hard work and quick learning ability. I actively participatein hackathon like Tech-Xcelerate, Webverse and am passionate about learning new technologies and concepts. I am seeking an onsite industrial internship to apply and enhance my skiills in a practical setting.
